

From RPG to BPM: True Modernization

IBM BPM A New Standard for Business Software Applications

- Rapid software development
- Easy to change
- User-understandable logic
- Collaborative IT-Business platform
- Fully enabled for
 - Mobile
 - Cloud
 - Integration
- Built-in social work environment
- Built-in process metrics analytics

IBM and Apex Deliver a New Path Forward for RPG and COBOL Shops.

It's Simple:

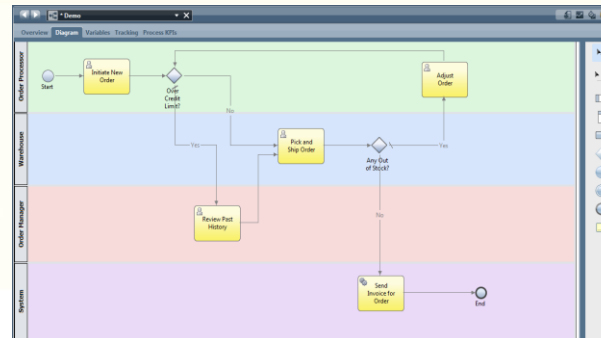

- One week demo project
- Hands-on training
- Concept to deployment of your first BPM application in 90 days
- Easy integration with your iSeries as needed

Shared Values RPG and BPM

When IBM released RPG in 1959 it provided a quick and easy solution for business software development: *a programming language designed specifically for business.*

Fifty years later IBM delivers a new tool for business programming, BPM, with **IBM as the clear market and technology leader, according to Gartner Group.**

Visible Logic for Business Collaboration

Rapid Development Web – Cloud - Mobile

“IBM BPM is a natural transition for RPG staff. It is business-focused, not engineering-focused.”
